water restrictions combined 1 to 6 v1

Wednesday, 5 December 2018

ODDS & EVENS SYSTEM EXPLAINED

- This means that if the street number of your property is odd you can water in accordance with the restrictions on odd days.
- If your property has an even number you can water in accordance with the restrictions on even days.
- If your property has a range of street numbers then it should be treated as odd or even as per the first number in the range. For example if your property is 12-15 Smith Street then you can water on even days in accordance with the restrictions.
- If your property has no street number then it should be treated as an even property. For example if your property is "Tara" then you can water on even days in accordance with the restrictions.

OTHER SOURCES OF WATER

These restrictions are restrictions that Council is placing on the use of its potable water supply. If the restrictions say "Not permitted" for a particular use, this means that Council's potable water supply cannot be used for this purpose. Water from another source, however, could be used for this purpose.

TIMES

Summer Time – **AEDT** Australian Eastern Daylight Time refers to Daylight Saving period 2.00am Eastern Standard Time first Sunday in October to Eastern Daylight Saving Time 3.00am first Sunday in April

Winter Time – **AEST** Australian Eastern Standard Time refers to the period outside of Daylight Saving Time

WSAP

This refers to a Water Savings Action Plan, an enterprise specific plan to adopt water efficiency prepared in accordance with "Guidelines for Water Savings Action Plans", NSW Office of Water, October 2005. A copy of this document is now available from NSW Office of Water.

Further water restrictions may permit the continued use of water for that activity

At certain levels of restrictions a business may be required to prepare a WSAP. The completed WSAP but only if the business strictly complies with its approved WSAP.

DEFINITIONS

- A watering system is any automated system for the watering of lawns by any means.
- A microspray irrigation system may be a manual or automatic lawn irrigation system that uses small sprays known as microsprays to irrigate lawn or gardens.
- A drip system is a surface or subsurface, manual or automatic system that uses a dripper or emitter to water lawn or gardens.
- A soaker hose is a fixed or moveable hose with a series of small openings to water lawn or gardens.
- A non-fixed sprinkler is an above ground sprinkler that is attached to and supplied with water from a hose or similar used, automatically or manually, with or without a timer, to irrigate lawn or gardens.
